1 Chapter 1 Introduction to Geography . R. Adam Dastrup. Most individuals define geography as a field of study that deals with maps, yet this definition is only partially correct. A better definition of geography may be the study of natural and human-constructed phenomena relative to a spatial dimension.

The number  $\pi$  (/ p aɪ /; spelled out as "pi") is a mathematical constant that is the ratio of a circle's circumference to its diameter, approximately equal to 3.14159. The number  $\pi$  appears in many formulas across mathematics and physics. It is an irrational number, meaning that it cannot be expressed exactly as a ratio of two integers, although fractions such as  $\frac{22}{7}$  are commonly used to ...

Balasubramanian Viswanathan, in Energy Sources, 2017. Introduction. In simple terms nuclear fusion is a process in which one or more light nuclei fuse together to generate a relatively heavier nucleus in which there is some mass deficiency that is released as energy, and the quantity of energy released follows Einstein's formula:  $E = mc^2$ , in which  $E$  is the energy in joules,  $m$  is the mass ...

The study of the earliest periods in Islamic history is made difficult by a lack of sources. For example, the most important historiographical source for the origins of Islam is the work of al-Tabari. While al-Tabari is considered an excellent historian by the standards of his time and place, he made liberal use of mythical, legendary, stereotyped, distorted, and polemical presentations of ...
