Leadership | About Us | John Deere US

Construction management (CM) is a professional service that uses specialized, project management techniques to oversee the planning, design, and construction of a project, from its beginning to its end. The purpose of CM is to control a project's time / delivery, cost and quality—sometimes referred to as a project management triangle or "triple constraints."

Construction management - Wikipedia

Construction management, or CM, is a complicated and constantly evolving field. To be the best possible construction manager and remain competitive, you will have to have a firm understanding of everything from construction fundamentals to leadership and project management, as well as a thorough grasp on local laws and building codes.
