Results. Nursing and physiotherapy academics (N = 10) were aware of a range of techniques to prevent musculoskeletal injuries in nurses, including education, equipment, health and safety policy and multi-disciplinary collaboration.However, several barriers to using these techniques were identified, including age, knowledge and availability of equipment, personal and contextual factors ...

Perspectives on preventing musculoskeletal injuries in ...

Human serum albumin is the serum albumin found in human blood.It is the most abundant protein in human blood plasma; it constitutes about half of serum protein. It is produced in the liver.It is soluble in water, and it is monomeric.. Albumin transports hormones, fatty acids, and other compounds, buffers pH, and maintains oncotic pressure, among other functions.
