In 2020, researchers Anna Wollny, Ingo Jacobs, and Luise Pabel set out to examine the impact that trait EQ has on both relationship satisfaction and dyadic coping. Dyadic coping is based on Guy Bodenmann's Systemic Transactional Model (STM), which predicts that stress in dyadic relationships is felt by both partners. 21 So, if one partner ...

Background. In many patriarchal cultures, the sexual history of girls and women is used as a significant determinant of their societal, community, family, and individual status [1, 2]. Frequently, conclusions about sexual history are made based on assumptions about the hymen, a small membranous tissue with no known biological function [3, 4], which typically occupies a portion of the external ...

The little tissue that couldn't - dispelling myths about the Hymen's ...

Malassezia furfur is a member of a monophyletic genus of fungi normally found on human and animal skin. These lipid-dependent, commensal yeasts normally constitute greater than 80% of the total fungal population of human skin and are frequently isolated in both healthy and diseased hosts.[1] Malassezia spp. have been implicated in several common dermatologic disorders, including seborrheic ...
