Mammals Pakistan Roberts T J

The origin of fauna in Indonesia was determined by geographical and geological events on the Asian continental landmass and the Australasian continental landmass (now Australia). The island of New Guinea is connected with the present Australian continent, formerly as part of the southern supercontinent Gondwana. This supercontinent began to break up 140 million years ago, and the new ...

Endangered Species. The puku antelope is limited to about 100 individuals along the Chobe River in Botswana and the Linyati marshes in Namibia. The black and white rhino have suffered the most from poaching and are on the verge of extinction. If there had been no effort to save them in the last 20 years they most likely would have disappeared altogether.

Introduction. In the last decade, the interest in the effect of climate change on human health has increased. The impact of Homo sapiens and his activities on the Earth's complex ecosystem have started since the beginning of farming, but it is only with the industrial revolution in the 18 th century that the changes produced by human activities on planet Earth have been accelerating exponentially.

Evoluție. Se estimează că linia Panthera s-a îndepărtat genetic de la strămoșul comun al Felidae de acum 9,32-4,47 milioane de ani în urmă până la 11,75-0,97 milioane de ani în urmă și originea geografică a genului este cel mai probabil nordul Asiei Centrale. Rezultatele analizelor diferă în relația filogenetică a leului; s-a crezut că formează un grup soră cu jaguarul (P ...
