IaC is the managing and provisioning of infrastructure through code instead of through manual processes. Automating infrastructure provisioning with IaC means that developers don't need to manually provision and manage servers, operating systems, storage, and other infrastructure components each time they develop or deploy an application.

Infrastructure as a service (IaaS) is a cloud computing service model in which computing resources are hosted in a public cloud, private cloud, or hybrid cloud. Businesses can use the IaaS model to shift some or all of their use of on-premises or collocated data center infrastructure to the cloud, where it is owned and managed by a cloud provider.
