Question for those of you who use Chipboard Paper for making sheet metal templates. Where on earth can you get this stuff?? I was given a stack of 24" x 36" sheets from an old school sheet metal guy a few years back and haven't been able to find a good resource for it since.

### Metal Shapers: Where to get chipboard template paper ...

The glue is sort of like a "Sticky note" and the template is easily removed and reapplied without tearing the paper or leaving any glue behind, it really works well. You want to apply whatever paper you use like a sheet of contact paper. You want it to "hug" the lines on the metal like a sticker would, with out air bubbles even.

NOTE: Lay out your cone directly on metal with a pair of dividers and a scribe, or use a compass to lay out your design on paper and transfer it to metal. 2. Extend lines AB and CD upward until they intersect. This is the center point. Mark it E. 3. Set the dividers to the distance between E and B. Place one leg of the dividers at E.

### REFERENCE ALL LEVELS | METALS How to Lay Out a Cone Template

Builders often use paper, or thin cardboard to make patch panels for sheetmetal. But they also use cardboard (or chipboard) for making 3-D brackets, boxes, and parts so that they can fit them into the vehicle just like the real metal part will. Then, by flattening out the cardboard template you can lay it out onto your material and cut it into just the right shape. With some bending and fiddling, you can end up with the exact same part made out of metal ready to weld or bolt onto your project.

### BangShift.com Cardboard Template Metal Fabrication Just ...

Print the full size design, rough cut around the outside with scissors and stick it to the sheet metal. If the design leaves too little paper stuck to the metal, it will peel off while sawing. For delicate stuff, I put the design on thin tracing paper and attach it to the metal with super glue.

### Transferring Drawing from Paper to Sheet Metal?

Give your presentations a polished look with free metal PPT backgrounds. There is no shortage of grey shades here, with themes, such as Metal Panel, Yellow Metal, and Metal Pastels. Download free metal PowerPoint templates fit for a formal presentation. There are quite simple chromatic designs available with fonts to match the metallic look in free metal PPT templates.

### Free Metal PowerPoint Templates

trace the template on a sheet, drill your holes (i use a sheet metal drill bit cause it leaves very clean holes) grab some gloves and a good pair of tin snips and you should end up with these boat propeller looking things.
