Cupping is a process of softening the tissue under the skin ie: muscles, fascia, lymph, and the layers of skin. Start with the smaller cups with light suction and increase suction as glide improves, then increase by one cup size and adjust the suction with that cup. When that cup and suction glides easily, then move up to the larger cup.

What Is Cupping Therapy? Uses, Benefits, Side Effects, and ...

The Cupping. Now that the coffee is prepared, let's begin with the first step in cupping - assessing the coffee's "fragrance". Although "fragrance" and "aroma" are used interchangeably they are quite different. Fragrance refers to the olfactory characteristics of the dry grounds themselves, while "aroma" is in the wet stage.
