Shenzhen XinTianJian ...

3-Axis Machining is the Most Widely Used Technique. Evolved from the practice of rotary filling, 3 axis machining is an average manual milling technique cutting parts on three axes; the X, Y, and Z axes. Invented in the 1800s, the vertical 3 axis CNC milling machine has come a long way in its

Each part of the machine requires its own CNC program. The primary CNC programming language is G-Code. Alternate to G-Code, there are Heidenhain and Mazak also in use. G-Code is programmed in such a way that it controls the movement of a machine by adjusting the position of x, y, and z-axis.
